ABSTRACT

Surveys and studies that have examined the teaching of psychology at the precollege level are listed in this bibliography. The research cited covers the years 1960 through 1983. Materials cited deal with a variety of topics, including educational practices, educational trends, state of the art, teacher certification requirements, the teaching of psychology in various states, student attitudes, educational history, teacher attitudes, teacher education, educational assessment, and enrollments. Complete bibliographic information is provided for each entry. Many of the studies are available in journal articles, through the ERIC system, or from publishing companies. Sources for the less readily available papers are provided. (RM)
